

SB Loop Minimum Rider Occupancy – At Enrollment

Vanpools must meet a minimum 70% occupancy rate to qualify for enrollment in SB Loop. The occupancy minimum is not negotiable. The minimum occupancy at vanpool program startup, per van size, is as follows:

Van Size (Driver + Passengers)	Minimum Occupancy To Meet 70% Enrollment Requirement
7 Passenger Van	5
8 Passenger Van	6
9 Passenger Van	7
10 Passenger Van	7
11 Passenger Van	8
12 Passenger Van	9
13 Passenger Van	10
14 Passenger Van	10
15 Passenger Van	11

Note: For qualification purposes, the number of passengers required to qualify has been rounded up. For example, a 13-passenger vanpool minimum occupancy requirement is 9.1 passengers and is rounded up to 10 passengers, since a vanpool does not meet the SB Loop Program Guidelines if 9.1 passengers are rounded down to 9 passengers.
